Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 March 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 68-75 and 116-120 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 68-75, 116-120 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 68-75, 116, 119-120 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Schweizer-3,842,840.

As to claims 68-70 and 72, Schweizer-'840 (F. 1-8) discloses suture cartridge 48 removably attached to suture instrument 10, suture wire 54, suture wire holder/bobbin 52, elongated suture wire guide or groove 56 defining a guide path/guide tube distal to wire guide or groove 56, suture wire guide support 26 and a drive mechanism including holder 52, element 44, element 57 and needle 62 to push the suture wire from the holder 52 forward of the drive openings as recited in the claims. Notice that the drive openings expose the suture wire to needle 62 substantially as recited in the claims.

Schweizer-3,842,840 does not disclose the tube portion of the device is cylindrical or not. However, cylindrical tube is a well known form of tube. Alternatively, it would have been obvious to one of ordinary skill in the art to form the tube portion of Schweizer-'840 a cylindrical tube as this form is well known.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 71, 73-74, 117-118 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schweizer-3,842,840.

As to claims 71 and 73, 75, Schweizer-'840 discloses substantially all limitations as recited in the claims, except for the elongated suture wire guide defining a tube. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Schweizer-'840 to have guide tube as recited in the claims, since changing the shape of the suture wire guide is only a choice of design, especially when the change does not critically improve the performance of the device.

As to claim 74, Schweizer-'840 discloses substantially all limitations as recited in the claims, except for a guide tube support including an approximately "I" shaped cross-section. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Schweizer-'840 to have guide tube support as recited in the claims, since changing the cross section of a portion of an element is only a choice of design, especially when the change does not critically improve the performance of the device.

As to claims 117-118, a suture wire of a metal such as a steel is well known for the strength and stiffness of the suture wire. It would have been obvious to one of ordinary skill in the art to provide a suture wire of steel for Schweizer-'840 device as this would provide more strength and stiffness to the suture wire.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 120 recites the limitation "the distal opening" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Response to Arguments

Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

This is a RCE application. The claims have been amended to further define the invention. The finality of the previous "Final Office Action" is withdrawn so that the Applicant has a chance to respond to the rejection.
